## **User Registration with Validation**

This project is a simple and secure User Registration System that includes form validation using HTML, CSS, and JavaScript. It ensures users enter valid information before submitting the form. The system can be expanded with login, session management, and database integration.

### Features

- ✅ User-friendly registration form
- ✅ Input validation for all fields
- ✅ Email format validation
- ✅ Password strength check
- ✅ Confirm password match
- ✅ Date of birth (DOB) validation
- ✅ Responsive design using CSS Flex/Grid
- ✅ Error messages for invalid inputs
- ✅ Optional: Password show/hide toggle and Remember Me functionality

### Technologies Used

HTML5 – For structuring the form

CSS3 – For styling and responsiveness

JavaScript (ES6) – For form validation logic

## Project Structure

### user-registration-validation

```
|
|— index.html    # Registration form
|— style.css     # Stylesheet for UI
|— script.js     # JavaScript validation code
└─ README.md    # Project documentation
```

## Validation Rules

### Field Validation Rule

Username Must not be empty

Email Must follow standard email format

Password Minimum 8 characters, with uppercase, lowercase, number, and symbol

Confirm Password Must match password

Date of Birth Must be a valid date and not in the future

### How to Use

#### 1. Clone the repository

Git clone <https://github.com/<your-username>/user-registration-validation.git>

#### 2. Open index.html in your browser.

3. Fill in the form and test validation.

Demo Screenshot

(Add a screenshot of my form here, e.g., form.png)

Future Enhancements

Add backend (PHP/Python/Node.js)

Store user data in a database

Include login and logout system

Add forgot password option
